

# **Bidirectional 12A/20A/40A/80A 2-4S/6S BEC 2A 5V**

## **Specification:**

- This product adopts imported components, full power test.
- Can be used in cars, ships, underwater thrusters.
- Bidirectional 1:1 power output, no brakes, direct reverse, fast response, good use.
- No need to calibrate the throttle stroke, plug and play.
- All products include BEC output.

Bidirectional 12A 2-4s BEC 1A 5V

Bidirectional 20A 2-4s BEC 2A 5V

Bidirectional 30A 2-4s BEC 2A 5V

Bidirectional 40A 2-6s BEC 3A 5V

Bidirectional 50A 2-6s BEC 5A 5V

Bidirectional 60A 2-6s BEC 5A 5V

Bidirectional 80A 2-6s BEC 5A 5V

Can work on 12V DC power supply.

## **Note:**

1. When using, the remote control throttle remote lever must be in the middle position, otherwise it will not start.
2. There is no need to calibrate the throttle stroke. When the electric adjustment starts, if the motor starts to turn,
