

PT60 APM PX4 Airspeed Tube Pitot

Features:

Precision Design: State-of-the-art Pitot tube for accurate airspeed measurements.

APM Compatibility: Seamless integration with ArduPilot Mega (APM) systems.

PX4 Technology: Advanced technology for responsive and reliable UAV performance.

Robust Construction: Durable materials ensure longevity and resilience.

Easy Installation: User-friendly setup for quick and hassle-free deployment.

Compact and Lightweight: Ideal for UAVs where weight and space are critical.

Versatile Applications: Adaptable for mapping, surveillance, and recreational flying.
