

## PRODUCT INTRODUCTION

USB Blaster high-speed downloader with level conversion, 1.2V-3.3V automatic adaptation

## PRODUCT FEATURES

1. Stable support for SignalTap II embedded logic analyzer function, data capture will never be chaotic!
2. Support the full range of devices from ALTERA company. Absolutely full range, don't worry about any device not being supported!  
CPLD: MAX3000, MAX7000, MAX9000, and MAXII, etc  
FPGA: Stratix, Stratix II, Stratix III, Cyclone, Cyclone II, Cyclone III, ACEX1K, APEX 20K, FLEX10K, etc.  
We Are The Distributor Of TZZT Brand In Hong Kong, China  
Active serial configuration devices: EPCS1, EPCS4, EPCS16, EPCS64, etc  
Enhanced configuration components: EPC1, EPC4, etc.
3. Supports three download modes: AS, PS, and JTAG;
4. Supports communication with Nios II embedded soft core processors and system debugging with the latest version of Rev. C firmware!
5. Fast speed: 6 times faster than the commonly used parallel download cable ByteBlaster11;
6. Easy to use: MiniUSB interface, easy to connect, 2 status indicator lights make debugging more convenient.  
We Are The Distributor Of TZZT Brand In Hong Kong, China
7. Must: Currently, laptops have almost eliminated parallel ports, so the commonly used ByteblasterMV and ByteblasterII download cables can no longer be used on laptops. Therefore, for laptop users, choosing a USB download cable is both convenient and necessary. TZZT
8. Fully compatible with ALTERA USB Blaster, with usage, functionality, and performance consistent with the original ALTERA download cable. TZZT
