

## Metallized Polyester Film Capacitor, Mini Box Type with 5mm Pitch

MEB are non-inductively wound with metallized Polyester film as dielectric and encapsulated in plastic case with epoxy resin filled.

### Features

- High moisture resistance.
- Good solder ability.
- Self-healing properties.
- Space-saving small size.

### Specifications

- Operating Temperature Range: -25°C ~ +85°C For between +85°C ~ +105°C, a decreasing factor of 1.25%°C on the rated voltage have to be applied.
- Capacitance Range: 0.001 μF ~ 2.2 μF
- Capacitance Tolerance: +/-5%(J)
- Rated Voltage: 63VDC, 100VDC
- Dissipation Factor: 1.0% max. at 1KHz, 25°C
- Insulation Resistance: >15,000 MΩ for C ≤ 0.33 μF, ≥5000 s for C > 0.33 μF & ≤ 1 μF
- Test Voltage Between Terminal: 1.4 X VR applied for 2 sec at 25°C±5°C

Unit:mm
