

Bovista

Bovista is the development of a new, individually adaptable enclosure for use in building automation systems and many other fields of electronics. Three basic sizes, each in white and grey, are available.

The enclosure base can be supplied with or without ventilation. In each case, eight different lid types, with different sizes and shapes, can be fitted to the base.

In addition to a smooth design, the customer can choose between lids with a membrane keypad area, design front or a hinged lid.

To fit the lid, simply snap it onto the base; the constructional design allows for horizontal or vertical fitting. The enclosure can be fitted to the wall by means of the integrated keyholes in the base or by the snap-on wall fitting plate.

In addition, as standard this plate has two cut-outs so that the enclosure can be used in combination with flush-mounted sockets.

In addition to printed surfaces and mechanical processing, (e.g. for display cut-outs), BOPLA also offers customer-specific membrane keypads.

Enclosure material: ABS (BVT-MB and BVL-MB made of PA6 15% GF); flush-mounted enclosure: steel panel, galvanised; front frame: powder-coated; for technical data see pages 646-650.

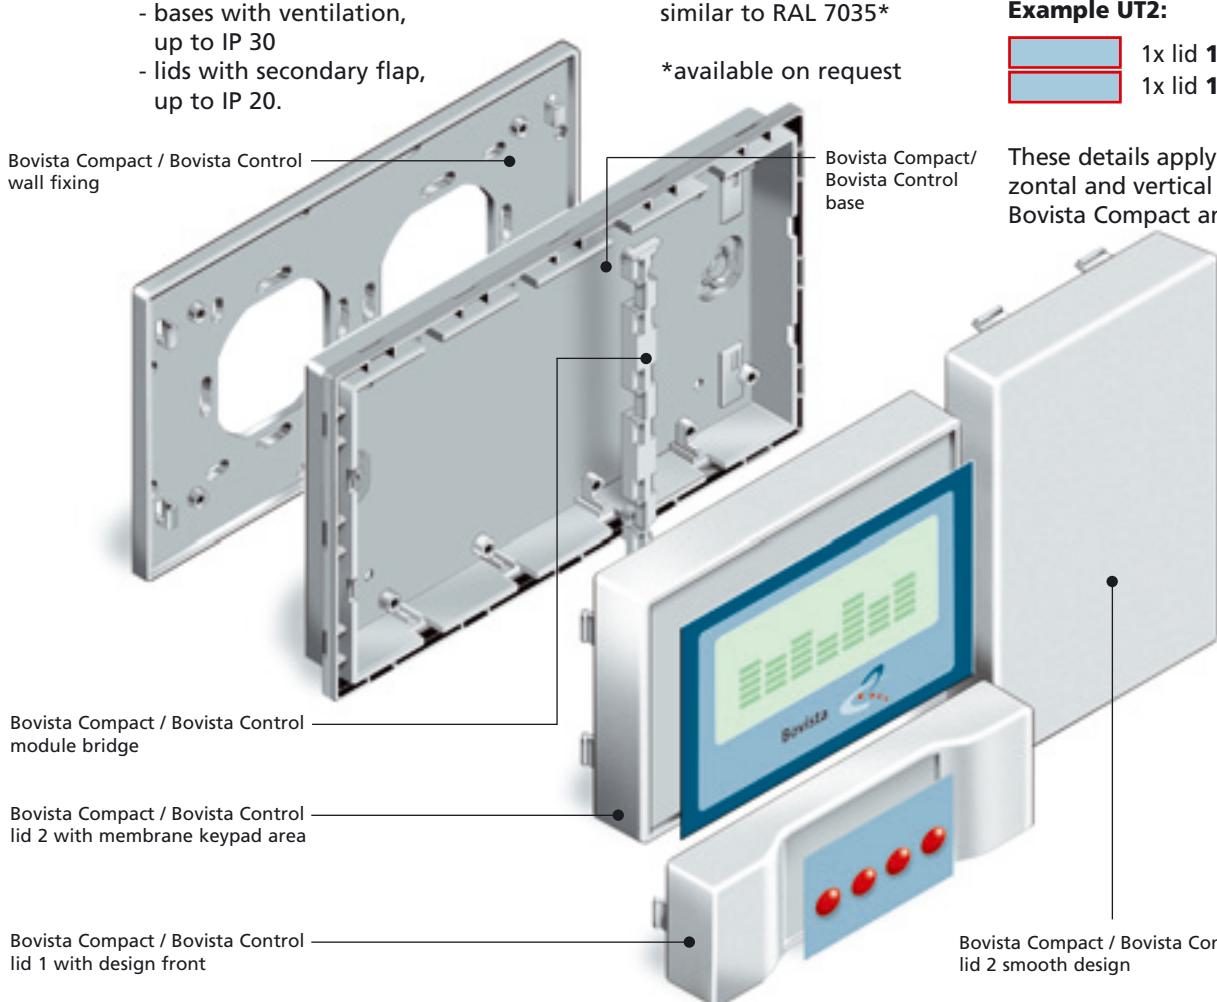

Colour: Bases and wall fittings agate grey, similar to RAL 7038 or pure white, similar to RAL 9010; lids light grey, similar to RAL 7035 or pure white, similar to RAL 9010; module bridges light grey, similar to RAL 7035; special colours on request; BVT/BVL-FO-9010 pure white, similar to RAL 9010; BVT/BVL-FO-7035 light grey, similar to RAL 7035 (available on request).

Ingress protection: Acc. to DIN EN 60529 depending on unit construction up to IP 40; if used with:
 - bases with ventilation, up to IP 30
 - lids with secondary flap, up to IP 20.

Accessories (additional charge):

- BVT-WB: Bovista Compact wall fixing
- BVL-WB: Bovista Control wall fixing
- BVT-WB2: Bovista Compact wall fixing 2
- BVT-MB: Bovista Compact module bridges (1 PU = 10 pcs)
- BVL-MB: Bovista Control module bridges (1 PU = 10 pcs)
- BVT-UP: Bovista Compact Unterputzgehäuse
- BVT-FO-9010: Bovista Compact front frame pure white, similar to RAL 9010
- BVT-FO-7035: Bovista Compact front frame light grey, similar to RAL 7035*
- BVL-UP: Bovista Control flush-mounted enclosure
- BVL-FO-9010: Bovista Control front frame pure white, similar to RAL 9010
- BVL-FO-7035: Bovista Control front frame light grey, similar to RAL 7035*

*available on request

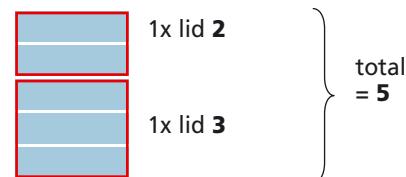

Hints on selecting the lids:

One base and several lids are needed in order to complete a Bovista enclosure. The various lids are available in sizes 1, 2 and 3.

The actual size is also shown in the product designation, e.g. lid "1" = smallest size. In order to cover a large base (UT) completely with lids, the numbers of the sizes in the product designation of the selected lids must total "5".

Example:

In order to cover a small base (UT2) completely with lids, the numbers of the sizes in the product designation of the selected lids must total "2".

Example UT2:

These details apply both to the horizontal and vertical application for both Bovista Compact and Bovista Control.

Bovista extension variants

I

II

III

IV

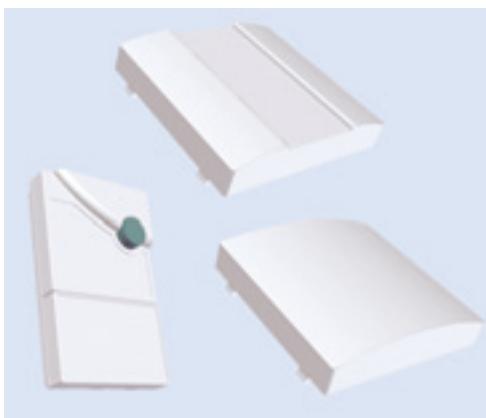

Thanks to the different lid designs which are available, the Bovista enclosure system offers an almost unlimited range of combinations.

The photos on this double page show some of the possible combinations.

Details of the combination of the illustrated enclosures can be found in the overview tables.

The enclosure lids and bases are each available in grey and white.

Examples of customer-specific special lids:

Bovista Compact

BVT-UT(-L)
Base (with ventilation)

BVT-UT2(-L)
Base 2 (with ventilation)

Both bases are suitable for horizontal and vertical use.

The enclosure can be fixed to the wall by means of the integrated keyholes or the snap-on wall-fixing BVT-WB which is available as an accessory (see pages 44-45).

The base is fitted with grooves for bulkhead walls which separate terminal sections from each other if necessary. In addition, Bovista Compact bases have fixing domes to accept PCBs.

Base with and without ventilation

Order designation

Model	Order no.	Order no.	L	W	H	Designation
BVT-UT	40001000	40101000	200	120	18	Bovista Compact base
BVT-UT-L	40001100	40101100	200	120	18	Bovista Compact base with ventilation

Scope of delivery:

1 base

Note:

All Bovista lids can be snapped directly onto the longitudinal sides of the bases. If a lid is turned 90° before being placed on the base, module bridges BVT-MB (pages 44-45) need to be fitted so that the lids can be snapped on and stabilised.

If module bridges are used, PCBs must be processed according to the adjacent drawings.

Caps EG-AK, which are used to cover the keyholes after fixing to the wall, can be ordered separately.

Order no. 33000100, PU = 2 pcs
Colour: agate grey, similar to RAL 7038

Base 2 with and without ventilation

Order designation

Model	Order no.	Order no.	L	W	H	Designation
BVT-UT2	40001200	40101200	120	80	18	Bovista Compact base 2
BVT-UT2-L	40001300	40101300	120	80	18	Bovista Compact base 2 with ventilation

Scope of delivery:

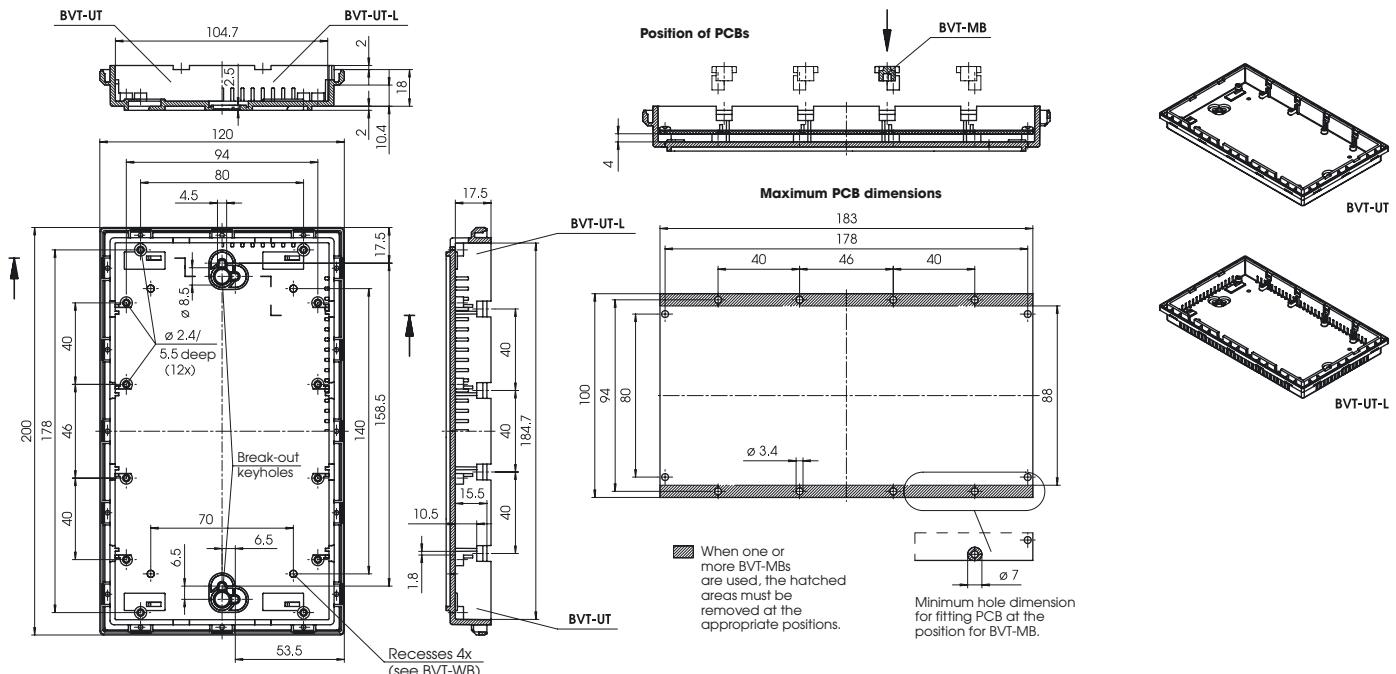

1 base

Note:

In addition to a smooth design, lids with a membrane keypad surface or a design front can be combined with Bovista Compact bases 2.

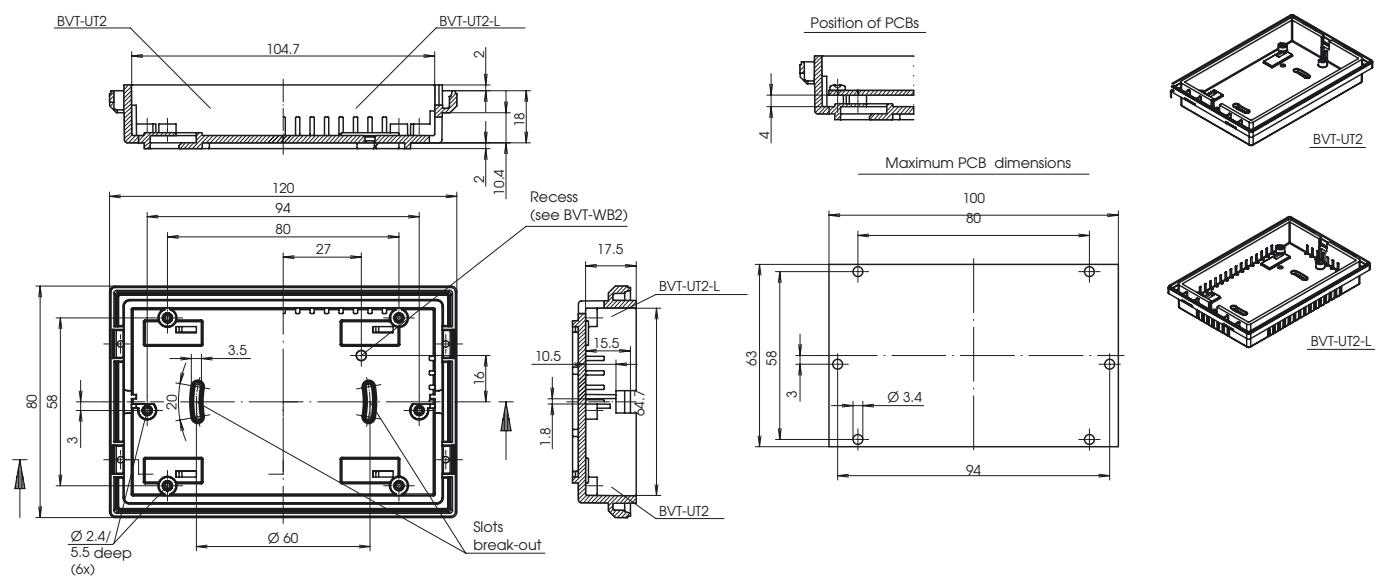

Fit the lids by latching them onto the base.
