

Product selling points:

1. 100% brand new high-quality products.
2. Made of high-quality materials, durable and practical.
3. Stable performance, easy to read, install, and use.
4. Large screen digital display, clear at a glance, energy-saving and low consumption.
5. Wide application range.

Product parameters:

Measurement voltage: DC 4.5-30V two wire connection

Display: Three digit 0.56 "LED

Refresh speed: approximately 300mS/time

Maximum input: DC 30V (there is a risk of burning out above 30V)

Minimum input: DC 4.5V (below 4.5V, measurement inaccurate or not displayed)

Minimum resolution: 0.01V (<10V)/0.1V (>10V)

Resolution: 1%  $\pm$  1 bit

Working temperature: -20 °C~65 °C

Size: Approximately. 48mm x 29mm x 22mm (length \* width \* height)

Hole size: approximately 46 \* 27mm

Current consumption:<23mA
