

Feature:

1. The machine is 2in1 Constant temperature LED digital display Wood Burning tools Pyrography Station ,1 handle is adjustable Pyrography pen, 1 handle is thermostatic Pyrography pen.
2. The machine we accompany with soldering iron holder,iron holder materials is Bakelite iron holder, even if over 300 degree put on the iron holder anywhere,it also is no problems.  
It have box and sued for put aside the tips, the soldering iron temperature adjustable pen will accompany 20 different tips ,suitable for diversified pyrography techniques.
3. Soldering iron thermostatic pen can as per your need,accompany with different wood burning tips, can also used 900M tips,please note,thanks
4. An affordable wood burning tool great for all levels of experience with quick change wire points (tips)
- 5.Raise your artwork to a higher level with greater control over the temperature, the burn depth and line color. Use the special tweezers to remove and replace the points to avoid damage to the tips or potential injury.
6. Temperature range of temperature adjustable pen: Temperature range is approximately 250 degree to 750 degree; always use the included safety stand.Temperature range of thermostatic pen:200-480°C

Technical data:

Whole machine Power consumption: 42W(MAX:145W)

Temperature range of temperature adjustable pen: 250-750oC

Temperature range of thermostatic pen: 200-480oC

Machine case color: have blue ,orange,black can choose

The package include :

YIHUA 939DII Wood Burning tools Pyrography Station \*1

Pyrography tips\*20

The tin collector \*1

Cross screwdriver \*1

This machine can used 2 different wood burning tools tips,also can used normal 900M-T series soldering iron tips ,if you need,you can choose you want tips
